

Each C-Yacht sailing yacht is 100% locally produced, in The Netherlands. From a solid design to a careful selection of materials to the eventual construction of the yacht. Paying scrupulous attention to even the smallest details, all along the journey. We take pride in that capacity. And granted, also C-Yacht adapts to changing times and systems. Which is why meanwhile also at our shipyard a part of the work is being done by machines and robots. Accent on 'part'. None of our yachts could be produced without human attention, love for the work or human craftsmanship.

Specification

Genoa	Genoa
